

Common Psychiatric Medications & Nonprescription Drugs

Sedative-Hypnotic & Antianxiety Medications		Opioids & Pain Medications		Bipolar Disorder Medications	
Generic name/Brand name®	Avg. daily dose (mg)	buprenorphine/Buprenex/Subutex	16	asenapine/Saphris (sublingual)	10–20
Benzodiazepines (BzRAs)		buprenorphine + naloxone/Suboxone	4–24	lithium/Eskalith/Lithobid	600–2400
alprazolam/Xanax	0.25–8	codeine	45–240	lamotrigine/Lamictal	100–400
chlordiazepoxide/Librium	5–250	fentanyl/Actiq (transmucosal)/ Duragesic/Sublimaze (transdermal)	varies	N-acetyl cysteine (add-on for depressive symptoms)	2grams
clonazepam/Klonopin	1–6	hydrocodone/Vicodin/Lortab	7.5–30	olanzapine+fluoxetine/Symbax	6/25–12/50
diazepam/Valium	2–40	hydromorphone/Dilaudid	1 & up	Protein kinase C inhibitors (under study for mania)	
flurazepam/Dalmane	15–60	meperidine/Demerol	50–150	risperidone/Risperdal	4–16
lorazepam/Ativan	0.5–1	methadone/Dolophine	10–80	sumatriptan (under study for bipolar disorder)	
triazolam/Halcion	0.25–0.5	morphine sulfate+naltrexone HCl/ Embeda (ER)	20/0.08–100/4.0	Many atypical antipsychotic drugs are approved for use in bipolar disorder, particularly to treat manic episodes.	
temazepam/Restoril	15–30	oxycodone/OxyContin	20–320		
z-compounds		oxymorphone HCl/Opiana (ER)	10+		
escatalopram/Lunesta	1–3	pregabalin/Lyrica	150–300		
zaleplon/Sonata	5–20	propoxyphene/Darvon	195–390		
zolpidem/Ambien/Ambien/ CR/Edluar/sublingual)	5–10	sumatriptan/Imitrex (for migraines)	25–50		
		sumatriptan + naproxen/Treximet	85/500		

Atypical Hypnotics		ADHD Medications/CNS Stimulants		
ramelteon/Rozerem	8	atomoxetine/Strattera	40–80	guanfacine/Intuniv (ER) 1–4
		caffeine	—	lisdexamfetamine dimesylate/Vyvanse (ER)
		cocaine	—	(prodrug) 20–70
		dexmethylphenidate/Focalin (ER)	5–20	methamphetamine/Methedrine/Desoxyn 5–25
		dextroamphetamine/ Dexedrine	5–40	methylphenidate/Ritalin/Concerta 5–50
		dextroamphetamine + amphetamine/Adderall	2.5–40	Daytrana (transdermal) 10–30
				modafinil/Provigil 100–200
				nicotine —
Other Medications for Anxiety		Nootropic Medications		
atenolol/Tenormin	25–100	donepezil/Aricept	5–10	memantine/Namenda 20
buspirone/Buspar	15–60	galantamine/Reminyl	16–24	rivastigmine/Exelon 3–12
clonidine/Catapres	0.1–3			
escitalopram/Lexapro	10			
hydroxyzine/Atarax/Vistaril	50–400			
propranolol/Inderal	80–640			

Antipsychotic Medications		Antidepressant Medications	
First Generation Antipsychotics (FGAs)		Selective Serotonin Reuptake Inhibitors (SSRIs)	
chlorpromazine/Thorazine	50–1500	citalopram/Celexa	10–60
fluphenazine/Prolixin	3–45	desvenlafaxine/Pristiq (ER)	50
haloperidol/Haldol	2–40	escitalopram/Lexapro	10
perphenazine/Trilafon	8–60	fluoxetine/Prozac/Sarafem	10–80
Second Generation Antipsychotics (SGAs)		fluvoxamine/Luvox (also ER) (for OCD & Social AD)	50–300
amoxapine/Ascendin	200–300	paroxetine/Paxil/Pexeva	10–60
asenapine/Saphris (sublingual)	10–20	sertraline/Zoloft	25–200
clozapine/Clozaril	300–900	venlafaxine/Effexor (also ER) (an SNRI at higher doses)	75–375
olanzapine/Zyprexa/ Zydis (soluble on tongue)	5–20	Tricyclic & Heterocyclic Antidepressants (TCAs & HCAs)	
paliperidone/Invega (ER)	6	amitriptyline/Elavil	50–300
quetiapine/Seroquel	25–400	clomipramine/Anafranil	25–250
risperidone/Risperdal/Consta (i.m.)	4–16	Other Treatments for Dementia	
ziprasidone/Geodon	40–160	acetylcysteine	nicotine (stimulates ACh)
Dopamine System Stabilizers (DSSs)		ampakines (may improve cognition)	NSAIDs (nonsteroidal anti-inflammatory drugs)
aripiprazole/Abilify	10–30	antiamyloid treatments (gene therapy or vaccines)	Omega-3 fish oils
		antioxidants	

All doses are oral unless indicated.

Opioids & Pain Medications			Bipolar Disorder Medications		
buprenorphine/Buprenex/Subutex	16		asenapine/Saphris (sublingual)	10–20	
buprenorphine + naloxone/Suboxone	4–24		lithium/Eskalith/Lithobid	600–2400	
codeine	45–240		lamotrigine/Lamictal	100–400	
fentanyl/Actiq (transmucosal)/ Duragesic/Sublimaze (transdermal)	varies		N-acetyl cysteine (add-on for depressive symptoms)	2grams	
hydrocodone/Vicodin/Lortab	7.5–30		olanzapine+fluoxetine/Symbyax	6/25–12/50	
hydromorphone/Dilaudid	1 & up		Protein kinase C inhibitors (under study for mania)		
meperidine/Demerol	50–150		risperidone/Risperdal	4–16	
methadone/Dolophine	10–80		sumatriptan (under study for bipolar disorder)		
morphine sulfate+naltrexone HCl/ Embeda (ER)	20.08–100/4.0		Many atypical antipsychotic drugs are approved for use in bipolar disorder, particularly to treat manic episodes.		
oxycodone/OxyContin	20–320				
oxymorphone HCl/Opana (ER)	10+				
pregabalin/Lyrica	150–300				
propoxyphene/Darvon	195–390				
sumatriptan/Imitrex (for migraines)	25–50				
sumatriptan + naproxen/Treximet	85/500				
ADHD Medications/CNS Stimulants					
atomoxetine/Strattera	40–80	guanfacine/Intuniv (ER)	1–4		
caffeine	—	lisdexamfetamine dimesylate/Vyvanse (ER)			
cocaine	—	(prodrug)	20–70		
dexmethylphenidate/Focalin (ER)	5–20	methamphetamine/Methedrine/Desoxyn	5–25		
dextroamphetamine/ Dexedrine	5–40	methylphenidate/Ritalin/Concerta	5–50		
dextroamphetamine + amphetamine/Adderall	2.5–40	Daytrana (transdermal)	10–30		
		modafinil/Provigil	100–200		
		nicotine	—		
Nootropic Medications					
donepezil/Aricept	5–10	memantine/Namenda	20		
galantamine/Reminyl	16–24	rivastigmine/Exelon	3–12		
Antidepressant Medications					
Selective Serotonin Reuptake Inhibitors (SSRIs)					
citalopram/Celexa	10–60	desipramine/Norpramin	100–300		
desvenlafaxine/Pristiq (ER)	50	doxepin/Sinequan/Adapin	100–300		
escitalopram/Lexapro	10	imipramine/Tofranil	25–300		
fluoxetine/Prozac/Sarafem	10–80	nortriptyline/Aventyl/Pamelor	50–150		
fluvoxamine/Luvox (also ER) (for OCD & Social AD)	50–300				
paroxetine/Paxil/Pexeva	10–60				
sertraline/Zoloft	25–200				
venlafaxine/Effexor (also ER) (an SNRI at higher doses)	75–375				
Tricyclic & Heterocyclic Antidepressants (TCAs & HCAs)					
amitriptyline/Elavil	50–300				
clomipramine/Anafranil	25–250				
Monoamine Oxidase Inhibitors (MAOIs)					
		phenelzine/Nardil	30–90		
		tranylcypromine/Parnate	20–60		
		selegiline/Emsam (transdermal)	5–20		
Atypical Antidepressants					
Other Treatments for Dementia					
acetylcysteine		nicotine (stimulates ACh)			
ampakines (may improve cognition)		NSAIDs (nonsteroidal anti-inflammatory drugs)			
antiamyloid treatments (gene therapy or vaccines)		Omega-3 fish oils			
antioxidants		phosphotidylserine/PtdSer (natural fat-soluble nutrient)			
COX-2 inhibitors (anti-inflammatory agents)		selegiline/Eldepryl (MAO inhibitor)			
ginkgo (increases blood flow to CNS)		statin drugs (lower cholesterol)			
hormone replacement therapy (estrogens or androgens)		vitamin B3 (niacin)			
huperzine/HupA (ACh esterase inhibitor)		vitamin C (antioxidant)			
L-methylfolate		vitamin E (antioxidant)			
neurotropic agents (human nerve growth factor)					

Miscellaneous Medications			
acamprosate/Campral	1998	ondansetron/Zofran	4–300
benztropine/Cogentin	150–250	sildenafil/Viagra	25–100
disulfiram/Antabuse	125–500	varenicline/Chantix (anti smoking)	0.5–1.0
naloxone/Narcan (i.v.)	.04–2	sodium oxybate/Xyrem	4.5–9 (grams)
naltrexone/Trexan/Revia	25–150	(for narcolepsy)	
nizatidine/Axid	75–300
